

Reasons for reducing base stations in long-distance communication

Overview

Will communication base stations reduce electricity consumption?

Our findings revealed that the nationwide electricity consumption would reduce to 54,101.60 GWh due to the operation of communication base stations (95% CI: 53,492.10–54,725.35 GWh) (Figure 2 C), marking a reduction of 35.23% compared with the original consumption. We also predicted the reduction of pollutant emissions after the upgrade.

Can low-carbon communication base stations improve local energy use?

Therefore, low-carbon upgrades to communication base stations can effectively improve the economics of local energy use while reducing local environmental pollution and gaining public health benefits. For this research, we recommend further in-depth exploration in three areas for the future.

How effective are communication base stations in reducing air pollution?

In Figure 5 A, after implementing optimization measures to communication base stations, the cases of COPDs related to air pollution caused by communication base stations in 2021 would be reduced to 13,004 (65% reduction). The effectiveness of these optimizations becomes more pronounced in the following year.

How important is electricity usage optimization in communication base stations?

The results indicate that the optimization of electricity usage in the rapid development scenario of communication base stations yields the most significant improvement, surpassing the base station layout optimization scenario by 1.14 times.

Reasons for reducing base stations in long-distance communication

[Optimization of Communication Base Station ...](#)

Dec 7, 2023 · In the communication power supply field, base station interruptions may occur due to sudden natural disasters or unstable ...

[Communication Base Station Innovation Trends , Huijue ...](#)

Rethinking Infrastructure for the 5G-Advanced Era As global mobile data traffic surges 35% annually, communication base stations face unprecedented demands. Can traditional tower ...

Active-Time Reduction of Base Stations for Energy Reduction ...

Oct 18, 2023 · This paper proposes an active-time-reduction technique of base stations for energy reduction using terminal position information estimated from wireless-communication signals.

[Optimizing redeployment of communication base station](#)

Feb 6, 2025 · Most of the current research is based on the performance of the base station (BS) itself or the operation mode of the communication operator without considering the

users' ...

Low-carbon upgrading to China's communications base stations ...

Nov 21, 2025 · It is important for China's communications industry to reduce its reliance on grid-powered systems to lower base station energy costs and meet nationa...

Optimization of Communication Base Station Battery ...

Dec 7, 2023 · In the communication power supply field, base station interruptions may occur due to sudden natural disasters or unstable power supplies. This work studies the optimization of ...

Multiple smaller base stations are greener than a single ...

Dec 2, 2025 · Multiple smaller base stations are greener than a single powerful one: Densification of Wireless Cellular Networks Agrim Gupta, Ish Jain and Dinesh Bharadia

Optimization Control Strategy for Base Stations Based on Communication

Mar 31, 2024 · With the maturity and large-scale deployment of 5G technology, the proportion of energy consumption of base stations in the smart grid is increasing, and there is an urgent ...

Energy-saving control strategy for ultra-dense network base stations

Aug 1, 2025 · Therefore, realizing efficient base station control while considering the interference and cooperation between base stations and reducing frequent switching remains an open ...

Multi-objective cooperative optimization of communication base ...

Sep 30, 2024 · This paper develops a method to consider the multi-objective cooperative optimization operation of 5G communication base stations and Active Distribution Network ...

Energy-efficiency schemes for base stations in 5G ...

In today's 5G era, the energy efficiency (EE) of cellular base stations is crucial for sustainable communication. Recognizing this, Mobile Network Operators are actively prioritizing EE for ...
