

Rooftop solar panels make money

Overview

How can I make money from solar panels on my roof?

The easiest way to make money from solar panels on your roof is through net metering. Utility users that produce solar power can feed part of the excess energy back into the grid thanks to net metering. With this billing strategy, solar clients receive credits against their electricity usage, which lowers their monthly expenses.

How can you make money from solar power?

You can make money from solar power by selling excess electricity back to the grid through net metering, earning solar renewable energy certificates (SRECs), leasing your rooftop to solar companies, and investing in or developing solar farms. These strategies help you generate income while promoting renewable energy use.

What is rooftop solar?

Rooftop solar is a type of roof-mounted electrical system that converts solar energy into electricity. Rooftop solar is a distributed power-generating system that helps satisfy a building's energy demand within an existing distribution network, which can be on-grid or off-grid.

Can rooftop solar PV reduce the energy burden of low-income households?

Rooftop solar PV can reduce or completely eliminate the energy purchased from utility providers and decrease the energy burden. These systems have been suggested as long-term sustainable solutions to reducing high energy burdens faced by Low-Income Households (LIHs) (Brown et al., 2020, Monyei et al., 2019, Heeter et al., 2021).
