

# San Diego Sine Wave Inverter

## Overview

---

What is a pure sine wave inverter?

A pure sine wave inverter is a device that converts DC power from a battery into AC power, allowing you to charge almost any household appliance or electronic device off-grid.

What is a 1000 watt sine wave power inverter?

Premium 1000 watt true sine wave power inverter. Provides clean, pure sinewave power ideal for sensitive electronics. Low battery shutdown prevents total battery discharge. GFCI & breaker protected (North American model only). Over temperature shutdown. USB port for charging USB equipped devices. Available in both 120Vac and 230Vac output voltages.

What is Sandi SDP series pure sine wave inverter?

SANDI SDP series Pure Sine Wave Inverter is the one of the most advanced technology DC to AC conversion products in the world, it's suitable use for areas without electricity, providing a complete power solution for strict demand applications.

How does a sine inverter work?

A sine inverter takes the DC output of your solar array, converts it to AC, and does so in a way which replicates as closely as possible the pure sine wave of grid power alternating current. Moreover, pure sine wave inverters amplify the converted current to differing strengths of wattage and voltage.
