

Seoul Telecom 5G base station

Overview

Does SK Telecom use AI to improve 5G performance?

SK Telecom (SKT) has partnered with Samsung Electronics to use AI to improve the performance of its 5G base stations in order to upgrade its wireless network. Specifically, they will use AI-based 5G base station quality optimization technology (AI-RAN Parameter Recommender) to commercial 5G networks.

Which South Korean mobile providers use a 5G non-standalone network?

Among South Korean mobile providers, both LG U+ and SK Telecom use a 5G non-standalone (NSA) network configuration, where voice is delivered via VoLTE (using the 4G network), while KT employs a 5G standalone (5G SA) network, where voice is carried over the 5G new radio (VoNR).

How will SK Telecom and Samsung improve 5G connectivity?

[SKT] Mobile carrier SK Telecom and Samsung Electronics will collaborate to improve the quality of 5G connectivity using AI. SKT will deploy a new Samsung-developed technology known as “AI-RAN Parameter Recommender,” which leverages data from previous mobile network operations, to recommend personalized parameters for base stations.

Is LG U+ the best 5G network in Seoul?

LG U+ led the market in 2H 2024 overall performance, with the carrier’s consistently strong showings across speed, reliability, and latency, allowing it to capture the award for the Best 5G Network in Seoul.
