Overview

Are Korea's three key battery makers launching a lithium-iron-phosphate battery?

Korea's three key battery makers — LG Energy Solution Ltd., Samsung SDI Co. and SK On Co. — are leaning into so-called lithium-iron-phosphate (LFP) battery technology as fast as they can, according to Byoungwoo Kang, a professor at Pohang University of Science and Technology who conducts research with Korean cell firms.

Are South Korean battery companies a suitable alternative to Chinese batteries?

The deal is LGES' first large-scale supply deal for LFP batteries and could indicate that South Korean battery companies are a suitable alternative to their Chinese counterparts for LFP batteries. LGES claims that it will offer a competitive price for its LFP batteries.

What is Samsung SDI's lithium iron phosphate battery prototype?

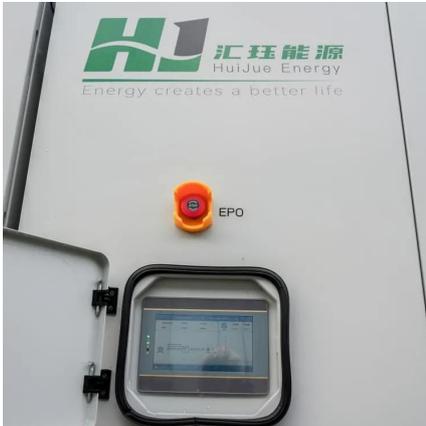

Samsung SDI's lithium iron phosphate battery prototype for energy storage systems is displayed at the InterBattery expo in March last year in Seoul. (Bloomberg).

Why are South Korean battery makers accelerating the development of LFP technology?

Pushed by new market dynamics, South Korean battery-makers, known for their expertise in nickel-based lithium batteries, are accelerating the development of LFP technology. This is also fueled by the expiry of core LFP patents in 2022, allowing LFP battery production outside of mainland China.
