

Serbia solar panels solar power generation

Overview

What does a solar project mean for Serbia?

For Serbia, this project means more than just meeting renewable energy goals. It promises energy independence, economic stability, and a sustainable energy supply. By creating a network of self-balancing solar plants, Serbia strengthens its energy security, attracts green investments, and aligns with global environmental standards.

Where will solar power be installed in Serbia?

The Ministry of Mining and Energy and EPS (Elektroprivreda Srbije) partnered with Hyundai Engineering and UGT Renewables to drive this project. Serbia will soon see six large solar plants strategically positioned across the country. Key locations include Negotin, Zaječar, and Bošnjace.

What is Serbia solar PV?

The electricity generated from the Serbia Solar PV will offset 1,900,000t of carbon dioxide emissions (CO₂) a year. UGT Renewables Serbia Solar PV will be a 1,000MW solar PV power project developed in a single phase. Articles, videos and more about our projects in Serbia.

How many solar plants are there in Serbia?

Serbia will soon see six large solar plants strategically positioned across the country. Key locations include Negotin, Zaječar, and Bošnjace. Together, these sites will provide 1 GW of solar energy capacity. Each plant will also have advanced battery storage systems totaling 200 MW, ensuring stable electricity flow across the national grid.
