

Slovenia more than a dozen solar panels

Overview

How much will Slovenia spend on solar energy?

Slovenia has set aside €16 million (\$16.7 million) to support solar energy communities, requiring projects to include at least 100 kW of PV capacity, with or without storage. The program will run until 2027.

How much solar power will Slovenia have by 2030?

In its report, issued a month ago, SolarPower Europe estimated that Slovenia could reach 6.2 GW in total solar power capacity by 2030. Of note, a record 55.9 GW was installed in Europe last year, 40% more than in 2022. The boom in photovoltaics is evident throughout the planet.

Did two Slovenian companies misrepresent a solar project to get EU funds?

The European Public Prosecutor's Office (EPPO) is investigating a €340,000 (\$349,350) fraudulent scheme allegedly involving two Slovenian companies accused of misrepresenting a solar project to obtain EU funds.

Which country has the most solar power in Europe 2023-2027?

According to the European Market Outlook for Solar Power 2023-2027, Slovenia was ninth with 593 W per person, up 72% year on year. It was the highest growth in Europe, according to SolarPower Europe. Ahead of Slovenia were the Netherlands, Germany, Denmark, Belgium, Estonia, Spain, Greece and Austria, in that order. Luxembourg was at number ten.
