

Solar circulating water pump for commercial use

Overview

What is a circulation pump?

These pumps are included in our solar water heating packages, and are used to circulate heat transfer fluid in the primary or secondary solar hot water loops. We have a number of circulation pump solutions for all types of applications, from single family home hot water systems, to industrial heating and air conditioning systems.

What are solar panels plus pumping solutions?

Solar Panels Plus provides a number of different pumping solutions for solar hot water and solar space heating systems. These pumps are included in our solar water heating packages, and are used to circulate heat transfer fluid in the primary or secondary solar hot water loops.

Can solar power be used as a submersible pump?

The solution is to use solar power as the submersible pump's power supply. Combining a photovoltaic system and a submersible pump provides a cost-effective, reliably operating and autonomous system for efficient irrigation in agriculture and livestock farming.

What is a 12VDC solar hot water pump?

12VDC Solar Hot Water Pumps - Can handle temperatures up to 230F and Pressures up to 145PSI - With three-phase ECM brushless DC motor. FDA, REACH, CE, RoHS, ISO9001 certificated (3.0 GPM) Only 17 left in stock - order soon. Only 6 left in stock - order soon. Only 10 left in stock - order soon. Only 9 left in stock - order soon.
