

Solar container battery gel

Overview

Can a gel battery be used on a solar system?

Gel batteries, like AGM batteries, can be particularly useful for small, off-grid solar systems. For example, a remote cabin with low energy demand and a small system on the roof may be the perfect candidate for a gel or AGM battery bank.

What is a gel battery?

2v Tgel battery in PPCP containers & steel modules are designed for deep discharge and float long-duration applications in the Solar, Energy Backup, Telecom & Power industries.

How long do 2V solar gel batteries last?

Get the best life out of your 2V Solar Gel battery banks. Gel Batteries have a designed life of 20 years. Microtex recommends you always refer to the manufacturer's Gel battery manual for your safety. For GTP, battery discharge curves, drawings, datasheet, and 2V tubular gel battery price - Please click anywhere in this box to send us an email.

Are gel batteries safe?

Because they are “sealed,” gel batteries don’t need their water levels checked and monitored like standard lead-acid options, nor do they expel gas. These factors generally make gel batteries safer than traditional lead-acid options, as they’re more of a “set it and forget it” product.
