Overview

What is a wit 35kW inverter?

High Efficiency: With a maximum efficiency of 98.00%, the WIT 35kW inverter ensures that a minimal amount of solar energy is lost during the conversion process, maximizing the energy available for storage or immediate use.

How big is a 35kW solar power system?

A 35kW system using 370W panels will require about 166.6 square meters of roof to be installed. Each 370W panel measures about 1.75m x 1m. 35kW solar power systems are mostly suitable for SMEs with medium energy needs. This size of solar power system is classed as "Commercial/Industrial".

Can a 35kW solar array be put on an inverter?

A 35kW solar array can be put with an inverter with an AC output of 26.25kW. What you "can" do is not what you "should" do. All inverters have different specs. And based on those specs you might be able to put a LOT more panels on than the rated inverter capacity. That does not mean you should.
