

# Solar glass inventory backlog

## Overview

---

What is solar inventory?

Solar Inventory is inventory carried by solar companies and can include: The management of solar inventory comes with some specific challenges which it shares with other highly innovative industries which experience similar demand & price volatility and technological disruption.

What are the best techniques for solar inventory management?

The best techniques for solar inventory management are the Reorder point formula, Consignment and Safety Stock. Solar Inventory includes inventory management of solar modules, solar cells, PV materials, solar paste, silicon wafers, frames, backsheets, junction boxes, PV glass, PV Equipment, PV connectors and racking & mounting.

Why is NSG launching a new solar glass production line?

January 2025: NSG Group has commenced operations of a new solar glass production line in the United States, strengthening its position in the solar photovoltaic glass market. This development is expected to enhance the supply of high-quality solar glass, supporting the growing demand in the renewable energy sector.

Is solar inventory a 'yes-to-be-sold' cost?

Regardless, the safest bet is to limit the amount of inventory you carry that's not directly for a sale order that you have in your hand. So, one of the key objectives of inventory planning is to help preserve your capital by limiting the amount of "yet-to-be-sold" inventory. When it comes to solar inventory, Storage is a non-negligible cost.
