

Solar panel price per watt now

Overview

How much does solar cost per watt?

According to the Solar Energy Industries Association, the average price per watt for residential solar projects was \$3.27 in the first half of 2023. That is up slightly from a low of \$2.92 before the pandemic, but down over 50% from the price of \$6.65 per watt in 2010. Knowing the price per watt of solar is good for two things.

How much do commercial solar panels cost?

Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt. There is a lot to consider when figuring out how much you'll spend on a solar installation.

How much does a solar system cost?

If you just need a few panels for a small do-it-yourself solar project, expect to pay around \$200 to \$350 per panel (between \$0.80 and \$1.40 per watt). Note: The table below doesn't include the cost of a solar storage battery, which can add anywhere from \$7,000 to \$18,000 to your total solar system costs.

How do you calculate solar cost per watt?

Calculating solar price per watt is pretty simple. Simply divide the cost of the system (in dollars) by the size of the system (in watts). $PPW = \text{System cost} / \text{System wattage}$ Now, solar systems are typically sized in kilowatts (kW), so you'll have to multiply by 1,000 to convert to watts.
