

Solar panels for home use

Overview

Which solar panel is best for home use?

This way, you can get the best price for your new system. Which type of solar panel is best for home use?

Generally speaking, monocrystalline panels are the best option for home use. However, polycrystalline and thin-film panels can be good options depending on the size of the system and other factors specific to you.

How many solar panels do I Need?

The number of solar panels you'll need for your home will vary based on factors specific to you, including the size of your home, energy needs, and location. However, the average home needs between 17 and 21 solar panels to completely offset utility bills.

Can solar panels power a home?

Solar panels are used to power everything from calculators to sports stadiums to satellites — and they can just as easily be used to power a home. You don't need to be a rocket scientist - or anything close to it - to get solar panels for your home.

Can solar panels save you money?

Homeowners can power their homes with solar panels to not only reduce their carbon footprint, but save around \$1,500 annually on electricity bills.
