

Solar panels in rural Cambodia

Overview

Is solar energy a good source of energy in Cambodia?

Solar energy in Cambodia is the country's second most promising clean energy source behind hydropower. Hydropower remains Cambodia's most developed renewable energy source but also has its own challenges – such as yearly variability due to droughts and floods.

How many solar farms are being built in Cambodia?

That tracker also reveals 620 MW of capacity is on the way from two solar farms currently under construction, with an additional four installations planned. Cambodia is also set to enhance its renewable energy infrastructure with two new storage projects, according to Minister of Mines and Energy Keo Rottanak.

How much does solar energy cost in Cambodia?

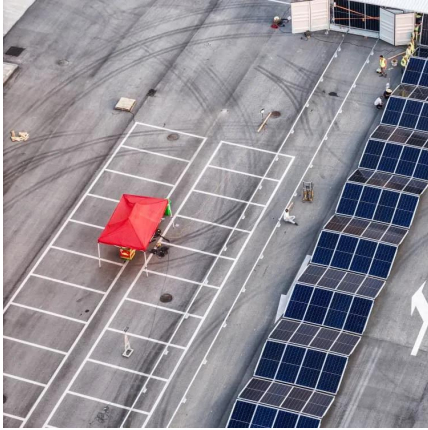

One of the promising traits of solar energy in Cambodia is its cost. The average electricity price for solar power is around USD 0.03 per kW, significantly lower than that of coal, which is USD 7.7 per kW.

Can solar power pump clean water from rivers & wells in Cambodia?

(Supplied) Veurn Vouth, program manager of Live and Learn Cambodia, said their project with the community harnesses solar energy to pump clean water from rivers and wells. It benefits eight communities comprising more than 80 families in remote, indigenous areas in Ratanakkiri and Stung Treng provinces.

Solar panels in rural Cambodia

[Rural Cambodia drives clean energy transition](#)
