

Solar power station for home in Moscow

Overview

How much solar energy does Moscow generate per kW?

In Moscow, Russia (latitude: 55.7483, longitude: 37.6171), the potential for solar energy generation varies significantly across different seasons. The average daily energy output per kW of installed solar capacity is as follows: 5.93 kWh in summer, 1.60 kWh in autumn, 0.91 kWh in winter, and 4.27 kWh in spring.

Does Russia have sufficient solar energy?

Despite the common misconception, Russia has more than enough insolation to produce solar energy. Moscow-based renewables company Unigreen Energy, which has received a government guarantee for its solar power contributions, confirms this.

Is Russia a good place to install solar?

Russia ranks 35th in the world for cumulative solar PV capacity, with 1,661 total MW's of solar PV installed. Each year Russia is generating 11 Watts from solar PV per capita (Russia ranks 72nd in the world for solar PV Watts generated per capita). [source] Are there incentives for businesses to install solar in Russia?

.

How to optimize solar generation in Moscow?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in Moscow, Russia as follows: In Summer, set the angle of your panels to 39° facing South. In Autumn, tilt panels to 59° facing South for maximum generation.
