

# Solar power station in China in Australia

## Overview

---

Located in New South Wales, the project marks BJEI's first solar energy investment in Australia and stands as Beijing Energy Holding Co., Ltd.'s most substantial overseas photovoltaic endeavor to date, boasting an impressive installed capacity of 280 megawatts. Where is powerchina solar project located?

The project is both the largest solar power initiative in New South Wales and POWERCHINA's first overseas EPC venture in Australia. The project is located about 5.5 kilometers south of Wollar village and approximately 300 kilometers from Sydney.

Are Chinese wind & solar companies developing their own projects in Australia?

The project is part of a growing trend of Chinese wind, solar and battery makers to develop their own projects in Australia, with Trina and Goldwind taking a similar approach.

Will Australian Government build a 600 MW solar farm?

Chinese clean energy supplier Jinko Power has filed a proposal with the Australian government to build a 600 megawatt (MW) solar farm with a 400MW/800MWh battery energy storage system in southern Queensland.

Will Trina Solar build a 1 GWh battery energy storage system in Victoria?

Chinese solar giant Trina Solar has lodged plans to build a 1 GWh battery energy storage system in Victoria as part of a broader strategy that aims to deliver more than 6.5 GW of large-scale renewable energy generation and storage projects across Australia.
