

Solar power substation solar container price

Overview

How much does a solar substation cost?

A traditional open-air substation for a 5 megawatt solar project just completed by S&C cost an estimated \$1.65 million and a comparably equipped substation for a 20 megawatt site would likely be in the \$2.65 million range, according to Girard. They can be finished, from first digging to commissioning, in three months, he added.

Are pre-packaged solar substations a good idea?

Pre-packaged substations for solar get projects online faster and cheaper. The solar industry is discovering a new, faster, and less costly way to connect to the grid.

What is a containerized mobile substation?

Containerized mobile substations are sheltered and address applications in challenging environmental conditions including areas of high pollution, and humidity. Customers requiring shorter overall delivery times and minimal on-site work have been the main drivers for Hitachi Energy's development of pre-fabricated indoor substations.

What is a small distribution substation?

Smaller distribution substations are subdivided into container-sized modules, which can be manufactured, assembled and tested at the factory, allowing easy transport and fast installation and commissioning at site.
