

Solar powered 138 volt water pump

Overview

What is a solar powered water pump?

A solar powered water pump is an eco-friendly, off-grid solution that uses solar energy to move water from wells, rivers, ponds, or tanks—without needing electricity or fuel. Perfect for farms, homes, and remote areas, these pumps are powered by photovoltaic panels and come in both surface and submersible options.

Are solar-powered water pumps eco-friendly?

Whether you are looking for the most environmentally friendly pumping solution on the market or want to give your garden a plus of beauty and elegance, a solar-powered water pump is what you should look for. It's 100% green, efficient and cheap! Each pump comes with its solar panel, and it's straightforward to install and use.

How many liters can a solar water pump handle?

The kit comes with everything you need for a solar-powered water pumping solution, including the 10W solar panel and DC brushless submersible water pump. This pump can handle a flow rate of up to 610 liters per hour, making it perfect for small ponds and aquariums.

How does a solar water pump work?

Solar powered water pumps work by capturing sunlight with solar panels. This sunlight is converted into electricity, which powers the pump's motor. So, as long as there's sun, our solar water pump will keep working. This system is efficient and cost-effective, especially in places where traditional electricity sources are scarce or expensive.
