

Solar powered water pumps in Cape Town

Overview

What is a surface solar pump?

Surface solar pump - these sit above ground and move water through pipes. They are handy for moving large quantities of water at a slow pace and are commonly found on farms or large irrigation systems where water needs to be moved from a lake or other body to fields or landscaping.

Are solar pumps a good solution to South Africa's electricity problems?

The solar pump is one of the most effective solutions to South Africa's electricity difficulties since it makes use of the sun's abundant free energy. Solar pumps are simple to install, need little maintenance, and have a lifespan of around 20 years. This implies that their serving expenses are minimal beyond the initial setup fees.

Are solar surface & bore pumps a good choice in South Africa?

Solar surface and bore pumps are ideal for use in many South African environments - after all, many of the most remote areas in this country get plenty of sunshine. Solar pumps are a popular choice for watering livestock, crop irrigation, industrial water supply and even residential and swimming pool applications. So what are the benefits?

.

What is a solar water pump?

The solar water pump is typically used in domestic water supply, irrigation projects and for pumping water. A solar water pump uses the energy of the sun. The electricity is provided by one or more PV panels which are connected to the electrical pump system. Solar pumps are a great alternative to the conventional method of pumping water.
