

# **Solar single-glass bifacial modules**

## Overview

---

Should glass/glass PV modules have bifacial solar cells?

However, glass/glass PV modules with bifacial solar cells deliver extra power in outdoor settings due to absorption from the module's rear side. As a result, a glass/glass module structure with bifacial solar cells was recommended by since it can fully utilize the potential of bifacial solar cells.

What are bifacial and monofacial solar cells?

Front and rear view of monofacial and bifacial photovoltaic (PV) modules . Bifacial solar cells encased in a glass/backsheet structure provide more power under standard test conditions (STC) than glass/glass PV bifacial modules.

What are bifacial solar panels?

The flexibility of bifacial modules allows for various installation orientations, including vertical and east-west, which can help balance load profiles and reduce bottlenecks. Bifacial solar cells are found to provide higher current density and power compared to monofacial cells.

Do bifacial solar cells provide more power?

Bifacial solar cells encased in a glass/backsheet structure provide more power under standard test conditions (STC) than glass/glass PV bifacial modules. However, glass/glass PV modules with bifacial solar cells deliver extra power in outdoor settings due to absorption from the module's rear side.
