

Solar water pumps in Tanzania

Overview

Are solar pump systems the future of water pumping in East Africa?

In East Africa in general, and Tanzania in particular, providing energy to (especially rural) areas for water pumping purposes can be logistically difficult and expensive. As such, solar pump systems are rapidly developing to replace old-fashioned, labor or fuel intensive pump systems.

Where can I buy solar power in Tanzania?

Various companies are active in the solar power business in Tanzania, serving all different market segments. In fact, these companies selling solar products range from importers to wholesalers, retailers and local solar shops. Most are centred around larger cities, particularly Dar es Salaam, Mwanza and Arusha.

What is a solar water pump system?

As such, solar pump systems are rapidly developing to replace old-fashioned, labor or fuel intensive pump systems. Power Providers installs solar water pumping systems that takes care of the entire pumping process: from pumping water out of the ground to point of end use (drinking, domestic or irrigation).

Can solar power pump water?

The advantages of using solar as a power source to pump water are plenty. For starters, it needs relatively little maintenance. Even in remote locations you can be assured that your system will function properly and keep doing its job.
