

# **Subsidy for wind power construction of solar container communication stations**

## Overview

---

Will onshore wind and solar farms be included in the Subsidy Scheme?

The government has included onshore wind and solar farms in the subsidy scheme for the first time since 2015. Photograph: Murdo MacLeod/The Guardian The government plans to double the amount of renewable energy it will subsidise next year after agreeing to include onshore wind and solar power projects for the first time since 2015.

Will China remove subsidies for photovoltaic projects in 2021?

China will remove subsidies for new centralized photovoltaic stations, distributed photovoltaic projects and onshore wind power projects from the central government budget in 2021 and work toward grid parity, the National Development and Reform Commission announced in mid-June.

Will wind and solar power enter the subsidy-free era?

Qian Jing, vice-president of module maker JinkoSolar, said the policies mark the era wherein wind and solar power finally enter the subsidy-free age. The policies could ensure that newly built wind power and photovoltaic projects can achieve reasonable profits, while directing investment in an efficient way, Qian said.

Why is there a subsidy gap for onshore wind & solar power projects?

Subsidies for onshore wind and solar power projects date back to 2009, when subsidy incentives drove rapid development of the country's new energy installed capacity. However, the generous subsidies previously allocated over the past few years weighed on central government finances and led to an increasing subsidy gap.

## Subsidy for wind power construction of solar container communication
