What is a Solar Combiner Box?

A Solar Combiner Box is an essential electrical device used in photovoltaic (PV) power generation systems. Its primary function is to combine the output currents of multiple solar panel strings (PV strings) into a single output, which is then sent to the inverter for DC to AC conversion.

What is a combiner box?

A combiner box is an electrical device used in solar installations to combine the output current from multiple solar panels into a single circuit, improving system efficiency and offering safety features like overcurrent protection.

What types of solar combiner boxes are available?

We offer a variety of solar combiner boxes, including DC and AC. DC combiner boxes cover 1-24 input channels, support 600V/1000V/1500V system voltage, and current range 10A-400A. AC combiner boxes support low-voltage and medium-voltage applications.
