

Super 12v capacitor

Overview

What voltage is a super capacitor rated for?

Super-capacitors in market today are normally rated for 2.5V, 2.7V or 5.5V. Just like a lithium cell these capacitors have to be connected in series and parallel combination to form high voltage battery packs.

What is a super capacitor?

For those of you who don't know much about super capacitors, here is a little bit of fun theory: Super capacitors act like any other kind of capacitor, only they can store tremendous amounts of energy. Many capacitors that you'd have seen in audio circuits have capacitances such as 470uf or 680uf (micro farads).
