

Swaziland off-grid solar power generation system

Overview

Are solar panels a viable source of electricity in Eswatini?

Photovoltaic (PV) solar cells are increasingly prominent sources of small-scale electricity production in Eswatini. The government actively encourages the adoption of solar panels in residential and commercial buildings to provide both electricity and water heating.

How is the Swazi government advancing its energy infrastructure?

In collaboration with private entities and foreign aid programs, the Swazi government is taking crucial and necessary steps to advance its energy infrastructure and deliver power to the 17% of the population (more than 200,000 people) living without it.

Who is Eswatini electricity company?

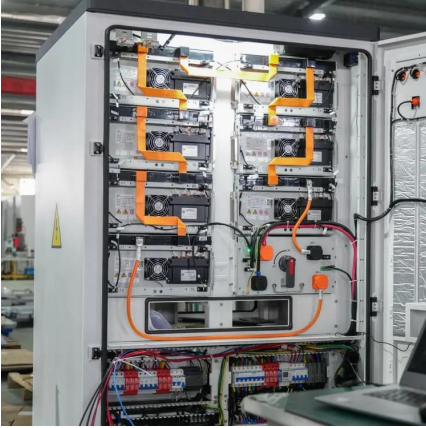

The Eswatini Electricity Company (EEC) is engaged in the business of generation, transmission and distribution of electricity in the Kingdom of eSwatini. Our technical expertise in the power industry is well recognised energy player especially in the Kingdom of Eswatini and SADC region.

Why is USL partnering with Eswatini's national grid?

USL's connection to Eswatini's national grid now contributes 31% of local grid-electricity production, pivotal in the country's impressive 32% point increase in electricity access between 2011 and 2021. To electrify the whole population, Eswatini initiated the Partnership for Affordable Renewable Energy in Swaziland (PARES) in 2018.
