

# Tajikistan Energy Storage solar Industry

## Overview

---

Does Tajikistan use solar energy?

The estimated solar potential is about 25 billion kWh/year in Tajikistan. There are about 2,100 to 3,000 hours of solar energy per year. While this potential has not yet been exploited, Tajikistan does utilize some solar resources for water heating purposes. Share of energy types on cooking energy in urban and rural areas of Tajikistan.

What is the energy sector of Tajikistan?

The energy sector of Tajikistan includes several entities. The electric power is the responsibility of the State-owned joint stock company Barqi Tojik, which entirely controls production, transportation and distribution of electricity in Tajikistan.

What is the solar energy potential of Tajikistan?

The climate of Tajikistan is very favorable for the use of solar energy, with an average of 280-330 sunny days per year. The total solar radiation intensity varies during the year between 280 and 925 MJ/m<sup>2</sup> in the foothills, and between 360 and 1120 MJ/m<sup>2</sup> in the highlands. Tajikistan does not have specified solar energy reserves mentioned in the provided text. The text only mentions their coal reserves.

What is the main source of energy in Tajikistan?

Based on close co-ordination with the Academy of Sciences and its public research institutions, relevant ministries, national enterprises, SMEs, international financial institutions (IFIs), and other bilateral or multilateral donors in the energy sector. Hydropower is the main source of energy in Tajikistan, followed by imported oil, gas and coal.

## Tajikistan Energy Storage solar Industry
