

# **Tanzania Wind Power Energy Storage Project**

## Overview

---

What is Tanzania's first wind farm?

Tanzania's first wind farm is helping to meet the energy needs of a rapidly expanding private rural grid network. Tanzania's first ever wind farm is up and running after a USD 1.2m mezzanine loan from REPP concluded the financing arrangements for the project and improved its overall commercial viability.

Where can wind energy be generated in Tanzania?

Wind energy Tanzania is endowed with potential areas for wind energy generation with an average speed of over 8m/s. The VRE Location Study (2023) shows that the central and western regions have good wind resources.

Should Tanzania invest in solar and wind energy?

The International Energy Agency (IEA) estimates annual clean energy investments will more than triple by 2030. With its vast resources and location, there are opportunities for Tanzania to investment in its abundant solar and wind energy potentials.

Does Tanzania have a good wind energy potential?

Wind energy: Tanzania has wind energy potential areas with average speeds of over 8 m/s. The variable renewable energy analysis conducted in 2023 shows that the central and western regions have good wind resources, with some areas experiencing wind speeds of more than 10 m/s.

## Tanzania Wind Power Energy Storage Project
