

The cost of solar glass

Overview

Solar panel glass costs can fluctuate depending on several key factors including quality, thickness, and manufacturer, typically falling within a range of \$5 to \$20 per square foot, with commercial applications potentially incurring additional expenses. How much does PV glass cost per square meter?

The cost of PV glass per square meter currently averages at \$6. Considering that double-glass PV modules use glass on both sides, the cost of glass alone doubles if compared to glass-foil solar panels. A benefit of most glass-glass solar panels is that they are frameless, which reduces their price.
