

The distance between UPS and battery cabinet

Overview

NOTE: The distance between the modular battery cabinet (s) and the UPS must not exceed 100 m. Contact Schneider Electric for installations with a longer distance. Prepare for Installation. How to install UPS & battery cabinet?

1. Installation sequence is as follows: 1.1 First, determine the installation location of the UPS and battery cabinet upon arrival at the site. 1.2. Install the battery connection Wires.

How to store ups without batteries?

The UPS or external battery cabinet without batteries may be stored at - 20° to 60°C (- 4° to 140°F). Ventilation: The air around the UPS must be clean and free of dust, corrosive chemicals, and other contaminants. The air must be free to circulate around the UPS and battery cabinet(s).

How do you install a battery cabinet?

Align the cables on the battery terminals so that the cable lug will not contact any part of the cabinet even if the battery is moved. Keep the cable away from any sharp metal edges. Install the battery cables so they cannot be pinched by the battery cabinet or UPS doors. BATTERY CABINET INSTALLATION.

How do I check the voltage between Battery Cabinet & ups?

The cable between the battery cabinet and UPS should be connected at the battery cabinet, but still disconnected at the UPS. Check the polarity and voltage between the positive (+) and negative (-) terminals. The measurement should be acceptable for your model's nominal voltage (see Table 23).
