

The role of explosion-proof uninterruptible power supply

Overview

What is an explosion-proof uninterruptible power supply system (UPS)?

Orga helps make daily operations easier, with Orga's Explosion-proof (EX) Uninterruptible Power Supply system (UPS). What does an Explosion-proof Uninterruptible Power Supply system do?

The batteries of our EX-certified UPS (Uninterruptible Power Supply) continue to supply power when the normal power supply is cut off.

Why are uninterruptible power supplies important?

Uninterruptible power supplies (UPS) are becoming increasingly significant as the importance of decentralized power sources grows and the dependability of power supply networks declines. Especially for applications that are safety essential or have a high need for plant availability.

Why do I need an ex-certified UPS (uninterruptible power supply)?

The batteries of our EX-certified UPS (Uninterruptible Power Supply) continue to supply power when the normal power supply is cut off. This ensures that critical systems keep running in order to keep the asset safe and compliant with relevant regulations in every situation, even in hazardous areas.

Can a modern UPS system be used in an explosion-protected area?

R. STAHL, with its more than 80 years of experience in explosion protection, is able to transfer the requirements of a modern UPS system into systems, which are suitable for use in explosion-protected areas.

The role of explosion-proof uninterruptible power supply

UPS

UPS for 100 % process reliability In times of increasing relevance of decentral power supplies and decreasing reliability of the power supply networks, uninterruptible power supplies (UPS) ...
