

The roof is fully covered with solar panels

Overview

Should solar panels cover all roofs?

This means if the world covered every roof with sun-tracking panels, it couldn't just cover 2/3 of electricity production, but all of it. It also doesn't cover the potential of large grid-tied solar projects, just rooftops.

Are in-roof solar panels right for Your House?

They integrate smoothly into your roof during construction or when you're replacing an old roof, avoiding the visual clutter of typical installations. Blending seamlessly with your roofline, in-roof solar panels can be a game-changer for your home. Here's why:.

What if all of the world's roofs were covered with solar panels?

Thus, if all of the world's roofs were covered with solar panels, all of current fossil fuel electricity generation could be eliminated, taking a big chunk out of the unhealthy pollution created by human activities.

How do in-roof solar panels work?

Just like traditional solar panels, in-roof versions use photovoltaic cells to turn sunlight into electricity. The big plus?

They integrate smoothly into your roof during construction or when you're replacing an old roof, avoiding the visual clutter of typical installations.
