

Ukrainian wind and solar energy storage power plant

Overview

How many solar power plants were installed in Ukraine in 2023?

As of early 2024, renewable energy capacity stood at 8.7 GW. Despite the war's challenges, in 2023, DTEK Networks connected over 1,400 new RES facilities to the system, commissioning 182.3 MW of wind and approximately 500 MW of solar power plants. In 2023, Ukrainian businesses invested around USD 150 mln in solar energy.

Does Ukraine have a solar power plant?

Ukraine's annual solar energy volume is higher than that of Germany, one of the industry leaders. From 2018 to 2020, solar energy capacity increased nearly fivefold. As of 2024, solar power plants account for about 75% of "green" energy production in Ukraine (excluding large hydropower plants).

How many wind power plants are there in Ukraine?

Before the full-scale invasion, Ukraine had 34 wind power plants with 699 wind turbines generating electricity at an average capacity of 3.5 MW. In 2023, the most significant new power plant commissioned was DTEK's Tiligul wind power plant in the Mykolaiv region, with a generating capacity of 78 MW.

Where are most renewable power plants installed in Ukraine?

Most renewable capacities currently installed in the country are concentrated in the southern and southeastern regions of Ukraine. According to various experts' estimates, as of August 2022, 30-40% of renewable power plants in these regions, or about 1.1-1.5 GW of installed capacity, have already been affected.

Ukrainian wind and solar energy storage power plant

[DTEK to build one of Europe's largest energy ...](#)

Jun 3, 2025 · Battery energy storage facilities are like a large power bank connected to energy grids, and are crucial for storing energy created by ...

[Ukrainian Renewable Energy Sector](#)

Sep 18, 2023 · The renewable energy sector accounted for 8.1 GW of installed capacity, of which: 5.1 GW were solar power plants; 1.5 GW - wind power plants; 1.2 GW - private solar power ...

[Ukraine solar storage: Impressive 6.9 MWh Project Approved](#)

Nov 1, 2025 · The project, developed by Energysave, features a 3.8 MW solar power plant coupled with a 6.9 MWh energy storage system. According to PV Magazine, the Ukrainian ...
