

# Uninterruptible power supply to water pump

## Overview

---

What is a water amp UPS (uninterruptible power supply)?

A WIMES (Water Industry Mechanical and Electrical Specifications) UPS (uninterruptible power supply) is a must have for water companies who want to meet their AMP commitments.

What is an Uninterruptible Power Supply (UPS)?

An Uninterruptible Power Supply (UPS) can supply voltage long enough for you to shut all your equipment down in the event of a power failure or power line down in a storm. It is better to shut off equipment normally than to have it suddenly lose power.

Why do water companies need ups?

Water companies need UPS systems to protect critical process control equipment, and critical infrastructure (valves and pumps) in water treatment and wastewater treatment processes. And UPS systems must meet WIMES (Water Industry Mechanical and Electrical Specifications) requirements.

## Uninterruptible power supply to water pump

---

### [Uninterruptible power supplies for pumps](#)

Features of the choice of uninterruptible power supply for pumping equipment When choosing an uninterruptible power supply for powering pumping equipment, several criteria are followed. ...

### Water

In-Line Integrated VFD's Allow Precise Motor Control  
Eliminates Single Point of Failure  
Complete Factory Tested UMD(TM) System  
The UMD(TM) system is designed to remove all Single Points of Failure. Traditional UPS systems must be doubled or excessively oversized to achieve the same safety level.
