

Ups uninterruptible power supply water pump

Overview

What is a water amp UPS (uninterruptible power supply)?

A WIMES (Water Industry Mechanical and Electrical Specifications) UPS (uninterruptible power supply) is a must have for water companies who want to meet their AMP commitments.

What is a UPS (uninterruptible power supply)?

A UPS (uninterruptible power supply) sits between an alternative source of power – such as a standby diesel generator – and protected loads.

Why do water companies need ups?

Water companies need UPS systems to protect critical process control equipment, and critical infrastructure (valves and pumps) in water treatment and wastewater treatment processes. And UPS systems must meet WIMES (Water Industry Mechanical and Electrical Specifications) requirements.

What is int power ups?

INVT Power UPS products range from 1kVA to 600kVA and various UPS accessories as an option, and now we can also offer precision cooling systems, and integrated modular data center solutions for customers, which meet your different requirements in different application scenarios.
