Overview

How does respect energy optimize Poland's largest battery energy storage system?

Respect Energy has been contracted to optimize Poland's largest battery energy storage system (BESS), a 14-MWh/7-MW facility operated by Elemental Group in Zawiercie. The BESS, consisting of seven containers with lithium-ion batteries, achieved 99.9% operational stability and a 48% efficiency increase through advanced algorithms and automation.

Will Poland's energy storage project be a benchmark?

The deal is one of the first of its kind between private-sector entities in Poland's energy storage sector, according to Axpo. The company expects the installation to serve as a benchmark for similar projects in Central and Eastern Europe.

What is Poland's new solar power plant?

The project, located in Poland's Wielkopolska region, is part of a broader push to enhance grid stability and integrate renewable energy. With a planned storage capacity of 241 MWh, the battery system will support a 60 MW solar plant and is expected to begin commercial operations in 2027.

Will Axpo be able to manage a 60 MW solar plant?

With a planned storage capacity of 241 MWh, the battery system will support a 60 MW solar plant and is expected to begin commercial operations in 2027. Under the agreement, Axpo will handle the commercial management and optimisation of the system, drawing on its experience in managing flexible energy assets across Europe.
