

What energy sites are there in Cote d Ivoire

Overview

Does Cote d'Ivoire have electricity?

Most of Cote d'Ivoire's primary energy demand is covered by local oil refinery supplies and domestic gas production. Almost 60% of the population had access to electricity in the country in 2017, a 10-percentage point's increase from 2015.

Is Côte d'Ivoire a good place to invest in energy?

Côte d'Ivoire faces vast opportunities and serious risks as it approaches the global energy stage. With its natural wealth, the country stands to reshape its economy and become a significant player in energy and mining. However, success hinges on managing the environmental impact and avoiding the dangers of over-reliance on resources.

Is Côte d'Ivoire a renewable country?

By 2030 Côte d'Ivoire aims for renewables to represent 45% of the power mix and GHG emissions to decrease by 30% relative to a BAU scenario. Eranove, through CIE, CIPREL and Atinkou, dominates power generation with a share of 39%. Around 80% of natural gas is produced by Foxtrot, while CNR accounts for around 70% of crude oil output.

What resources does Côte d'Ivoire have?

Côte d'Ivoire also holds valuable resources beyond oil. The country possesses rich gold, lithium, manganese, nickel, and coltan reserves. Over the past decade, authorities tripled the number of mining permits to nearly 200. In May 2024, officials announced a significant gold find in the west.
