How big is a 34kw solar power system?

A 34kW system using 370W panels will require about 161.4 square meters of roof to be installed. Each 370W panel measures about 1.75m x 1m. 34kW solar power systems are mostly suitable for SMEs with medium energy needs. This size of solar power system is classed as "Commercial/Industrial".

How do you calculate the maximum power of a photovoltaic system?

The first step in calculating the maximum power of a photovoltaic system is to determine the specifications of the solar panels being used, including the Maximum Power Point (MPP), which is the voltage and current. The annual energy output of a photovoltaic solar installation is calculated by dividing the maximum solar panel power by the area.

Do I need a 34kw Solar System?

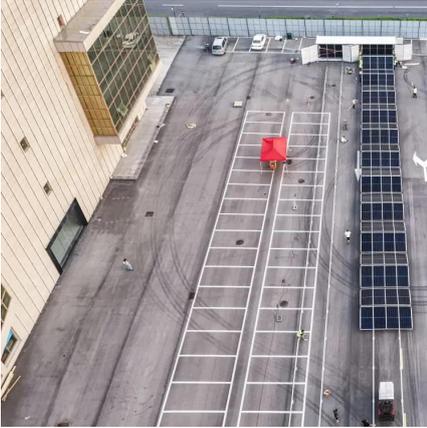

Whether or not you need a 34kW solar system will depend on many things. If you are a Commercial/Industrial customer and you use between 135.5kWhs and 205.3kWhs then a 34kW solar system could be a good choice to help reduce power bill costs.
