

# Where are the batteries in the battery cabinet produced

## Overview

---

Where do batteries come from?

The costs of sourcing these materials add up to about 50% of the final battery cost. Sourcing these materials is anything but easy and requires labor-intensive mining. Lithium is sourced from the United States, Argentina, South Korea, Australia, and Chile. Aluminum is being sourced from all over the world as it isn't nearly as scarce.

Where are Tesla batteries made?

Giga Nevada: A Pioneer in Battery Manufacturing Located in Storey County, Nevada, Gigafactory Nevada focuses on producing battery packs and energy storage products. Tesla and Panasonic jointly designed the facility: Panasonic supplies critical battery cells, while Tesla integrates these cells into its battery packs. Image courtesy of Tesla.

Where are Giga batteries made?

You'll find production at Giga Nevada, focusing on battery packs, and Giga Shanghai, which serves the Asian market. There's also Giga Berlin for Europe and Giga Texas for North America. Each facility is designed to boost production capacity while minimizing costs and transportation distances for raw materials.
