

Wind solar and energy storage industry destocking

Overview

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

How will the energy storage mandate impact China?

S&P Global estimates that the storage mandate has driven between 50 and 75% of domestic demand. With China accounting for around 56% of the global energy storage demand in 2024, the impact of such a policy change will be massive.

How will China's energy storage policy affect global demand?

“China was on-track to install over 60% of all utility scale storage globally in 2025 and so in the absence of further policy changes, about 45% of global demand has just been wiped away,” Hilton says. The ripple effect on the global demand-supply balance will involve further downward pressure on energy storage prices.

How will wind & solar payments work in 2025?

New policy introduced in February 2025 requires wind and solar payment mechanisms to move toward more market-based structures, where 100% of wind and solar generation is to be traded in the wholesale market with local governments left to define their own implementation details by the end of the year.

Wind solar and energy storage industry destocking

[Europe Completes De-Stocking. Emerging Markets See ...](#)

Jul 1, 2024 · Residential solar and energy storage installation in Europe Currently, total power demand in emerging markets continues to rise, but their power generation and grid facilities ...

[Global Energy Storage Growth Upheld by New Markets](#)

Jun 18, 2025 · The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

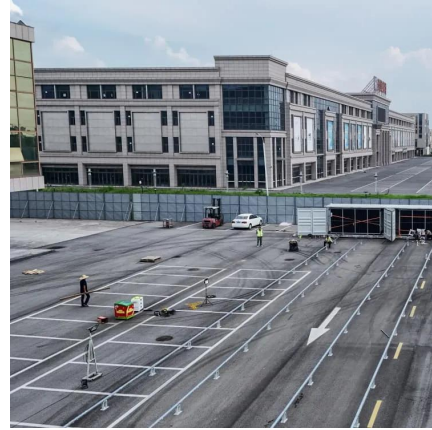

[Energy storage industry set aggressive goals for 2025](#)

Dec 5, 2025 · The battery storage industry in the U.S. has grown in leaps and bounds in recent years, surpassing its most aggressive targets to become one of the largest new sources of ...

[Europe Completes De-Stocking. Emerging ...](#)

Jul 1, 2024 · Residential solar and energy storage installation in Europe Currently, total power demand in emerging markets continues to rise, but ...

[Competitive Destocking May Be Around the Corner for China](#)

Dec 5, 2023 · The industry is about to enter a new destocking phase as solar panel makers are expected to cut operating rates further this quarter so as to clear their inventories. Second-
...

[China scraps energy storage mandate for ...](#)

Mar 14, 2025 · In a major policy shift towards electricity market liberalization, China has introduced contract for difference (CfD) auctions for renewable ...

Battery storage makes 'anytime solar' dispatchable - this is what wind

1 day ago · Battery storage makes 'anytime solar' dispatchable - this is what wind needs to catch up As solar companies steam ahead in the race for energy storage, progress for wind depends ...

[Energy storage industry set aggressive goals ...](#)

Dec 5, 2025 · The battery storage industry in the U.S. has grown in leaps and bounds in recent years, surpassing its most aggressive targets to become ...

[Wind and solar need storage diversity, not just capacity](#)

Jul 23, 2025 · In practice, energy storage is often oversimplified as a tool for "capacity compensation"--the idea that merely increasing the scale of storage can bridge the ...

Destocking is coming to an end! The global household storage industry

In 2023, the global household storage industry has experienced the impact of multiple factors such as falling prices of raw materials and batteries, falling electricity prices and adjustment of ...

[Energy Storage Rides a Wave of Growth but Uncertainty ...](#)

This report comes to you at the turning of the tide for energy storage: after two years of rising prices and supply chain disruptions, the energy storage industry is starting to see price ...

Key takeaways from China-EU Solar & Energy Storage Industries ...

Dec 3, 2025 · Solar and storage industry leaders from China and Europe gathered in Germany this week to advance cross-border partnerships, launch a bilateral storage collaboration ...

China scraps energy storage mandate for renewable energy ...

Mar 14, 2025 · In a major policy shift towards electricity market liberalization, China has introduced contract for difference (CfD) auctions for renewable energy plants and removed the ...
