How do I install solar panels on my RV?

To install solar panels on an RV, follow these steps: Fit the battery (use a battery tray if necessary and a strap to secure it in position). Ground the negative battery terminal by taking a battery strap and attaching it to an earth point on the chassis.

Where can I find solar installation tools?

You can find most solar installation tools you need in your toolbox. However, there are a few more specialist tools, like a multimeter. Make sure you have them before you start. Check out our complete guide for how to use a digital multimeter in your camper.

How do you connect a solar charge controller to a roof?

To connect a solar charge controller to the roof of an RV, first, securely connect the positive cable from the solar charge controller input fuse holder to the charge controller as per the manufacturer's instructions. Tidy all the cables on the roof and secure excess cable with gaffer tape beneath the solar panels. Use P-clips and cable ties to keep the wires tidy and secure.
