

Yaound Solar Container 40kWh

Overview

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.

What is a solar PV container?

The Solar PV Container is a containerized solar power solution. It has been designed with the aim of combining solar electricity production and mobility to provide this electricity everywhere around the world.

How many installers does a solarcontainer need?

At least 3-4 installers and 1 crane operator are needed to put the Solarcontainer into operation within one day. How many households can one Solarcontainer supply with electricity?
