

Zinto Uninterruptible Power Supply

Overview

How do you test a Zinto 2000 & 3000 ups?

Connect the power supply cable (supplied with the ZINTO 2000 and 3000) for the UPS system into a socket. The display on the UPS system shows "Sb". Hold the "ON / MUTE" button on the UPS system down until you hear a short beep. The UPS system carries out a self-test, after which "OK" appears on the display.

Why should you choose a Zinto rack tower system?

Two of the many highlights of the ZINTO range are its performance of up to 3000 VA with silent operation and its design as a versatile rack tower system with just 2 height units. The 'Buck & Boost' function offers additional security by electronically handling short power outages without using a battery.

What software is included with the Zinto range?

The ZINTO range is supplied as standard with DataWatch, a comprehensive software solution for shutting down and managing the PC or server system and for monitoring the ZINTO and the power supply network. To ensure you are always working with the latest version of DataWatch, please download it from the download area of.

Why should you buy a Zinto model from online?

Models in the ZINTO range from ONLINE are the best way of preparing for these kinds of scenarios. ZINTO protects sensitive applications from data loss and operating downtime, whether they are price-sensitive entry servers or high-end PCs, telephone systems, network peripherals or NAS boxes.
